Mike,

As discussed on our call today, I am providing results from the concrete sampling in pot room #1. The two tables labeled "validated" are the samples that were collected originally in accordance with the Concrete SAP. The two "unvalidated" sets of data are the results from the recent additional sampling that was completed in accordance with the Concrete SAP modification. I have also attached a map showing the locations where the samples were collected in pot room #1.

A formal letter outlining our proposed path forward will follow.
